Lynette C Daws	United States
Carmine Pariante	United Kingdom
Viviana Trezza	Italy
Andreas Papassotiropoulos	Switzerland
Jess Nithianantharajah	Australia
Sukhwinder Shergill	United Kingdom
Kenji Tanaka	Japan
Nic van der Wee	Netherlands

The **ISN-JNC Flagship School** is an initiative to support young scientists in their career by increasing their scientific knowledge, network and visibility in the field.

Around 40 young scientists from around the world are invited to spend one week with high-ranked international speakers in a retreat-like atmosphere. Aside from the outstanding scientific presentations given by the invited speakers, the students will also have the chance to present their own work during poster sessions and increase their general scientific skills in a variety of tutorials.

Applications are open for **advanced ISN Student Members** (at least one year of lab experience in a PhD project) and **ISN Postdoc Members** (up to 5 years after the year the doctoral degree was awarded).

Specific enquiries about your application should be directed to the ISN Secretariat secretariat@neurochemistry.org

Confirmed Topics:

Addiction

Mood

Developmental Disorders

Schizophrenia

Anxiety
